PRESS-N-PEEL by Techniks. The easiest and quickest way to transfer pc board patterns to copper-clad board. Works great with CAD and PCB layouts as well as artwork from magazines and books.

No need for photochemicals or darkroom; use a photocopier or laser printer to transfer your design to the special PRESS-N-PEEL film. Then, simply iron the design onto a clean copper-clad board with a household iron. Peel off the film, and the board is ready for etching (etchant solution not included).

Note: We are getting reports that PnP isn’t working well with later model Brother brand copiers and laser printers.

PRESS-N-PEEL consist of five 8 1/2” x 11” sheets of transfer film & complete instructions.
