

CAT# AA-11 GLASS BREAK DETECTOR HOOK-UP SHEET

Designed to activate an automobile alarm system. It has an electret microphone which responds to sharp, loud sounds, like breaking glass.

There are two sensitivity adjustments that can be adjusted to react to different volume levels. When activated by a sharp sound, Pin 1 provides a 12 Volt output for about 4 seconds and the red LED lights. Pin 2 provides a brief, momentary pulse and the green LED lights.

PIN# 1 = -12 Vdc output - 4 second pulse
PIN# 2 = -12 Vdc output - momentary pulse
PIN# 3 = +12 Vdc input

PIN# 4 = -12 Vdc input
PIN# 5 = use unknown
PIN# 6 = use unknown
