

# REVISED INSTRUCTIONS FOR I/O MAGIC WIRELESS OPTICAL MOUSE CAT# MSE-16

The instructions packaged with the product are not particularly helpful. We suggest that you ignore them and do the following:

1. Put batteries in the mouse
2. Plug in charger stand/ receiver. Put mouse in stand and let it charge for a few hours or more.
3. Plug-in receiver/ charger to USB or PS-2 port on computer. An adapter is provided for PS-2 port.
4. Link mouse with receiver:
  - a. Press the ID Link Button on the bottom of the charger/ receiver. You may need a pencil or paper clip to do so. The LED will flash.
  - b. Press the ID link button on the bottom of the mouse. The LED on the charger will flash faster when connection is made. The mouse may work at this point. If not, go to next step.
5. If necessary, install driver. The driver is provided on a floppy disc. If your computer doesn't have a floppy drive you can download what you need from the internet. One of the download sites is <http://list.driverguide.com/list/company512/>
