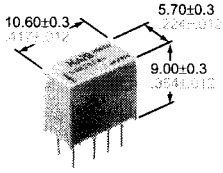
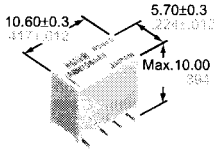
ULTRA-SMALL PACKAGE SLIM POLARIZED RELAY

GN-RELAYS





mm inch

FEATURES

• Compact slim body saves space
Thanks to the small surface area of 5.7 mm × 10.6 mm .224 inch × .417 inch and low height of 9.0 mm .354 inch, the packaging density can be increased to allow for much smaller designs.

• Outstanding surge resistance.
Surge withstand between open contacts: 1,500 V 10×160 μs (FCC part 68)
Surge withstand between contacts and coil: 2,500 V 2×10 μs (Bellcore)

• The use of twin crossbar contacts ensures high contact reliability.
AgPd contact is used because of its good sulfide resistance. Adopting low-gas molding material. Coil assembly molding technology which avoids generating volatile gas from coil.

• Increased packaging density
Due to highly efficient magnetic circuit design, leakage flux is reduced and changes in electrical characteristics from components being mounted close-together are minimized. This all means a packaging density higher than ever before.

• Nominal operating power: 140 mW

• Outstanding vibration and shock resistance.
Functional shock resistance:
750 m/s² {75G}
Destructive shock resistance:
1,000 m/s² {100G}
Functional vibration resistance:
10 to 55 Hz (at double amplitude of 3.3 mm .130 inch)
Destructive vibration resistance:
10 to 55 Hz (at double amplitude of 5 mm .197 inch)
